DETAILED SPECIFICATIONS

1. **PROJECT MISSION.** Design an iconic City Hall building in downtown Clearwater that focuses on creating a municipal campus with the adjacent municipal buildings and creates efficiencies that benefit the public and city operations.
2. **BACKGROUND & SITE DESCRIPTION:** Clearwater City Hall, located along the Bluff in downtown Clearwater, was built in 1966 and the property has been identified as a redevelopment site in support of Imagine Clearwater, which is central to Clearwater's downtown redevelopment efforts. In 2019 staff vacated the building and temporarily moved to an office building in the downtown area. A new City Hall is proposed to be located on the 1.675-acre block (bordered by Pierce St., S. Myrtle Ave., Franklin St. and S. East Ave.) directly south of the city's Municipal Services Building, located at 100 South Myrtle Avenue, Clearwater, FL 33756.

The new building is anticipated to be approximately 40,000 gross square feet, based on previous space needs parameters, and would include office space and meeting space for public meetings.

3. **SCOPE OF SERVICES.** The City of Clearwater intends to engage an architectural firm to conceptualize a new city hall that anchors a municipal campus that includes the current Municipal Services Building, Clearwater Police headquarters and Municipal Services Garage into a connected and cohesive public complex. The city would also like the successful firm to analyze the space needs of the adjacent municipal services building and the needs of those departments anticipated to reside in the new City Hall to reimagine space allocation within the adjacent buildings with a focus on balancing internal and external efficiencies, such as a development services center. Firm shall evaluate using reclaimed water for cooling water and grey water systems. Innovative and cost-effective design for both construction and long-term operational and maintenance costs is paramount. The City wishes to consider obtaining a mid-level formal LEED certification versus constructing to LEED standards.

The successful firm will be expected to bring these concepts and ideas to life through full architectural and site designs that balance function and aesthetics with constructability and budget while ensuring that the building is constructed with environmental sensitivity in mind and assists the city in meeting its sustainability related goals. While architectural design is focused on a new city hall, the city may choose to partner with the successful firm on generating architectural plans for renovation of the municipal services building as an add on to this project. Staff expects a minimum of three conceptual design options for staff review and comment following conceptual review, to include alternative architectural styles. Additionally, the city expects the successful firm will provide a preliminary plan for public engagement at the time of firm selection.
