DETAILED SPECIFICATIONS

1. **PROJECT MISSION.** The City of Clearwater is dedicated to providing superior services to its customers in order to improve the quality of life for Clearwater residents, businesses and visitors. The City is looking for vendors who share that dedication and will help the City meet that goal.
2. **INTRODUCTION.** The City of Clearwater (City) is seeking an architectural and/or engineering firm to provide design services related to a 550+ space Public Parking Garage, located behind the Peace Memorial Church at 110 S. Fort Harrison Ave, Clearwater, Florida. The professional services include designing the proposed Parking Garage in addition to subsequent bidding and construction engineering inspection (CEI) services relating to the development of the garage.
3. **BACKGROUND & SITE DESCRIPTION.** The City of Clearwater is developing Coachman Park in downtown Clearwater into a large recreational area with an event venue. A significant portion of the redesigned park had previously been used for public parking. To recoup some of the parking lost to development, the City is procuring property from Peace Memorial Church at 110 S. Fort Harrison Ave., Clearwater, Florida. This parcel will contain the new parking garage for use by the public and Peace Memorial Church. The footprint of the parcel abuts S. Osceola Ave on the west, Pierce Street on the south, an unnamed alley to the east, and a property belonging to Pinellas County to the north.

The new garage shall be of adequate size to contain at minimum 550 automobiles and comply with the Clearwater Downtown District and Development Standards. Frontage on the ground floor of the parking structure shall include "20' deep enclosed/occupiable space, with 60% min. window coverage".

4. **SCOPE OF SERVICES.** The primary goal of this project is to design a modern public parking garage with first floor commercial space that complements the architecture of the surrounding area. Innovative and cost-effective designs for both construction and long-term operational and maintenance costs are paramount. The City would also like the successful respondent to include aspects that capitalize on sustainability, energy efficiency, and the City's Greenprint 2.0 initiatives in the final design. The winning firm shall evaluate the inclusion of solar, space for micro-mobility modes, EV charging, and floor occupancy reporting. The City wishes to consider obtaining Parksmart certification.

Anticipated services include, but are not limited to site assessment/preparation, design development, cost estimating, construction drawings, and specifications. While primary scope of this initial phase of the project focuses on the design of a suitable structure, the City also intends to utilize the successful firm through the build process, necessitating the need for bid documents, as-needed permit(s) acquisition, and post-design construction services through the duration of the project.
